

# Nationwide Sprint PCS Network Coverage Map

## EV-DO Coverage

Sprint offers Mobile Broadband coverage to:

- 188.4 million people nationwide (over half the US population)
- 219 markets nationwide with populations of 100,000 or more
- 780 airports across the United States

### Regarding EV-DO Coverage Maps

These maps depict approximate service areas for outdoor coverage, based on computer-generated, radio-frequency coverage projections and information provided by third parties. They are not a guarantee of service availability. EV-DO coverage is anticipated coverage at launch and subject to change at Sprint's discretion. Actual coverage, quality, and availability of coverage may vary based on network problems, signal strength, customer equipment, terrain, structures, weather, and other limitations or conditions. EV-DO coverage is not available everywhere and may not be available in all the areas depicted on these maps.
